

I'm Kareem Amr, A 16-year-old Palestinian programmer with a strong passion for problem-solving and continuous learning.

Over the years, I've taken part in several national competitions, where I sharpened my skills in algorithms and competitive programming.

I'm proficient in multiple programming languages and enjoy tackling challenging problems that require creative solutions.

Outside of coding, I'm also a chess player and proudly achieved 3rd place in the Palestinian Chess Championship.

Mohammad Attili

A 16-year-old Palestinian competitive programmer passionate about technology, innovation, and artificial intelligence.

Achieved high placements in several competitions, participated in multiple national contests, and competed in global online challenges.

My name is Osama Jadba, and I am a Palestinian student at Tulkarm Industrial Secondary School, 11th grade. I have a strong passion for programming, artificial intelligence, and lifelong learning.

I am an active member of the programming and AI clubs in Tulkarm, where I have developed my skills and explored different areas of technology.

Driven by my ambition, I constantly work on self-development and gaining life experiences that will help me achieve my future goals, especially in coding and problem-solving. Throughout my academic journey, I have earned multiple excellence certificates that reflect my dedication and achievements.
